

Hard Shell

The Ultimate Ballistic Protection

VIP UNDERVEST

Overview

This new resistant under vest is a state of art product designed for discretion and flexibility. The anatomical flex points and breathable mesh give this one piece design the optimal comfort when used in hot climate zones. The concept behind the shirt comes from professionals that are working daily in a threatening environment in hot climate zones. Their requirement for ultra-light weight, free moving space and absolute comfort is very crucial, as professionals will wear their body armour in comparison to uncomfortable armour that is often left at home. The inner fabric has properties like the thermo regulation and sweat management.

Features
