

## HS - NEPTUNE II

*Hard Shell*

### OVERVIEW

The Neptune II model offers a lighter tactical ballistic protection solution for users working on or around the water. It is designed with a view that the floatation device is not required in all the operations being carried out. So, light weight floatation foam is used to maintain buoyancy when required. The provision of both Soft armour & Hard armour panels, makes the vest can be usable in any kind of conditions both on land & in hostile waters.
